

Proposal to Change Titles of IP Monographs-reg.

The Indian Pharmacopoeia Commission (IPC) is committed to ensuring that the content of the Indian Pharmacopoeia (IP) aligns with current regulatory practices. Accordingly, IPC proposes to change titles of certain monographs listed in Table 1 (Oral Suspensions Monographs i.e. dry powder) and Table 2 (Injection Monographs i.e. powder form) in the next edition of the IP (i.e. IP 2026). The change will involve a shift in the terminology used in the monographs to ensure better clarity among stakeholders for enhanced regulatory compliance.

This change is being implemented to align with established international standards and to ensure that the monographs clearly indicate the intended use of the finished formulations. This will ensure a more straightforward approach of monograph classification for manufacturers, regulatory bodies, and other stakeholders.

In view of the above, IPC kindly seek your attention to these proposed changes, as they may impact the way certain marketed products are labelled and classified. Should you have any queries, comments or require further clarification regarding this change, please do not hesitate to contact us at lab.ipc@gov.in.
