PDG EXPANSION PRESS RELEASE

Pharmacopeial Discussion Group Announces Outcome of 2025 Expansion Round

The Pharmacopeial Discussion Group (PDG) announces the outcome of its latest expansion round. After careful consideration of available resources and strategic priorities, PDG has decided to admit one pharmacopeia during this phase of expansion.

Following a thorough review process and a consensus decision among PDG members, the Korean Pharmacopeia has been selected for admission as a Candidate Participant ([Framework for the PDG to introduce new members](#)). This decision reflects the strength and quality of the Korean Pharmacopeia's application and its alignment with PDG's mission to promote global harmonization of pharmacopeial standards.

PDG extends its sincere appreciation to all applicants for their interest and participation in this round. The group remains committed to fostering collaboration and transparency in future expansion efforts.
