Indian Pharmacopoeia Commission  
Ghaziabad*

# Second Prize

**3<sup>rd</sup> National Pharmacovigilance Week**

**Public Participation in Pharmacovigilance**

**Definition**

Pharmacovigilance is the science and activities relating to the detection, assessment, understanding and prevention of adverse effects or any other medicine/vaccine related problem.

**Aims and Objectives**

- To Improve patient care and safety
- To Improve public health and safety
- To Contribute the assessment of benefit, effectiveness and risk of medication
- To Promote understanding, education and awareness

**Adverse Drug Reaction?**

It is defined as 'an appreciably harmful or unpleasant reaction resulting from an intervention related to the use of a medicinal product; adverse effects usually predict hazard from future administration.'

**What To Do If I Observe This Type of Reaction When I Administer Medicine and How Do I Report It?**

Any kind of Medicine, Herbal Preparations, Vaccines, Biologics and Medicinal product

Reactions like rashes, urticaria, hypo-tension, SOB, giddiness, epilepsy, dryness of lips, skin etc.

**WHO**  
Any Health care Professional, Patient, Common man, Industry

**WHAT**  
All type of adverse events of suspected drug, event can be known or unknown, serious or frequent

**WHEN**  
If it is not serious then report within 30 days if it is serious report before 7 days of occurrence

**HOW**  
By reporting AMC centre  
PVPi App  
Phone number  
Email id

AMC CENTRE  
PVPi APP  
1800-180-3024  
pvpil@icpdia.net  
pvpil.compost@gmail.com

All the data will be collected from all the sources and these are sent to National Coordination Centers (NCC). This NCC send data to WHO, it will analyse the data and if required will generate Signal to Industries and Public.

**BENEFITS OF REPORTING**

- Provides updated information to all doctors, healthcare professionals and general public
- Understand the benefit and risk of that particular product
- Regulatory interventions like change in prescriptions, change of drug class, recall from market
- Measure the economic impact on ADR prevention

**3<sup>rd</sup> National Pharmacovigilance Week**

**TO AVOID ADVERSE EFFECTS**

**Do's**

- Inform about all the medications that are taken in the past
- Always ask your pharmacist regarding the right dose and right timing
- Read and follow the instructions as advised
- Complete the course treatment
- If you observe any ADR report immediately

**Dont's**

- Do not abruptly quit medicines until advised by doctor
- Do not hesitate to report any kind of ADR
- Do not take any expired products
- Do not misuse or overuse the medicines
- Avoid self medications
- Do not take medications that are prescribed to friends or family

**STRATEGIES TO BOOST CONFIDENCE IN PUBLIC**

- To create awareness regarding the importance pharmacovigilance
- Implementation of schemes like National pharmacovigilance programme
- Collaborate with Public Health Programme Organisations
- Train general public regarding the process of Identification and reporting ADR
- Establishment of AMC monitoring centres in every District
- Install procedures for decision making and triggering actions in case of immediate concern
